## University of Freiburg INATECH - Insitute for Sustainable Systems Engineering MSc. Sustainable Systems Engineering

Author	Carlos Andrés Castañeda López,
	Matriculation Number: 5778510
Editing Time	June 23, 2025 - September 10, 2025
Examiners	Prof. Dr. Stefan Glunz,
	INATECH - Institute for Sustainable Systems Engineering
	Chair for Photovoltaic Energy Conversion
	Prof. Dr. Oana Cojocaru-Mirédin,
	INATECH - Insitute for Sustainable Systems Engineering
	Chair for Cross-scale Material Characterization
Supervisor	Dr. Frank Dimroth,
	Fraunhofer Institute for Solar Energy Systems ISE
	Head of Department III-V Photovoltaics and Concentrator Technology, Division Photovoltaics
Declaration	I hereby declare, that I am the sole author and composer of this Thesis and that no other sources or learning aids, other than those listed, have been used. Furthermore, I declare that I have acknowledged the work of others by providing detailed references of said work.
	I hereby also declare, that my Thesis has not been prepared for another examination or assignment, either wholly or excerpts thereof.

#### **Abstract**

Your abstract goes here.

#### Zusammenfassung

Ihre Zusammenfassung kommt hier hin.

## **List of Figures**

#### **List of Tables**

#### Introduction

This chapter outlines the motivation for this thesis in the field of electrical engineering. Possible problems that could be encountered during the development and evaluation process are also discussed.

#### 1.1 Motivation

This Thesis targets a key topic of...

#### 1.2 Problem and Research Questions

#### **Theoretical Background**

This chapter provides background knowledge to understand the concepts in the thesis.

#### State of the Art

This chapter compares the current state of the art and the work done in this thesis. Note Quotations always end before a full stop, question mark, comma, etc... like so: "I know", she said.

## **Implementation**

This chapter contains a description of how the implemented algorithm works.

#### **Experimental Setup**

This chapter contains an explanation of how the experimental setup was done, what parameters had to be controlled, and the equipment used.

#### **Results and Discussion**

In this chapter, the results of the thesis are presented and evaluated as well as, the approach of this thesis.

## Summary

This chapter provides a summary of the key findings and contributions of this thesis.

#### Conclusion

Your conclusion goes here.

In this chapter, a conclusion is made and the thesis is roughly summarised.

#### **Outlook**

In this chapter, the future work and potential improvements for the thesis are discussed. Your outlook goes here.

#### **Acknowledgments**

Your acknowledgments go here.

## Appendix A

## **Appendix**

Your appendix goes here.
